Notes:
 * Age of patient is calculated by subtracting the patient's full date of birth from the full date of procedure (date-to-date).
 ** Based on the 83rd Texas Legislature requirement, starting with 2014 Induced Terminations of Pregnancy (ITOP) data, fetus age is reported in weeks post-fertilization versus the previously reported weeks of gestation. Post-Fertilization Age (PFA) is generally two weeks less than gestational age.

Definitions:
 Dilation and evacuation: Surgical procedures performed after 14 weeks 0 days gestation are called dilation and evacuation (D & E) procedures. This type of surgical procedure typically requires a greater degree of cervical dilation and the use of grasping forceps.
 Ethnicity: The classification of a population that shares common characteristics, such as, religion, traditions, culture, language, and tribal or national origin.
 Gestation period: Number of completed weeks elapsed between the first day of the last normal menstrual period and the date of procedure.
 Hysterotomy: Evacuation of the pregnancy through incision of the uterus.
 Induced termination of pregnancy: Any act or procedure performed after a pregnancy is medically verified with the intent to cause the termination of an intra-uterine pregnancy other than for the purpose of either the birth of a live infant or removing a dead fetus.
 Intrauterine Instillation: Injecting saline or prostaglandin into the uterus to cause contractions, which expel the contents of the uterus.
 Medical (nonsurgical) abortion: Administration of medications for the purpose of inducing an abortion.
 Occurrence data: Data compiled by the geographic place in which the event occurred without regard to the place of residence of the individual(s) involved in the event.
 Race: A geographical population of humankind that possesses inherited distinctive physical characteristics that distinguish it from other populations.
 Residence data: Data compiled by the usual place of residence without regard to the geographic place where the event occurred. For births and fetal deaths, the mother's usual residence is used as the place of residence.
 Sharp curettage (dilation and curettage, D&C, or surgical curettage): A surgical procedure in which the uterine contents are removed with curette.
 Suction curettage (Vacuum Aspiration): Removal of uterine contents through a flexible tube attached to a suction apparatus.

Data Sources: Reports of induced termination of pregnancy sent to Texas Health and Human Services per the Texas Abortion Facility Reporting and Licensing Act, Health and Safety Code, Chapter 245 and through public health surveillance agreements with other states.
Prepared by: Data Dissemination, Center for Analytics and Decision Support, HHSC, February 2019 (al).
